

Natural Gas Update

JANUARY 9, 2006

By now you have probably opened your natural gas bills and realized that the cost of heating your schools has almost doubled from last year.

We will not bore you with the multitude of reasons behind this dramatic increase; we would however like to make you aware that MISEC is working on a program that will not only lower your heating costs, but will also bring some price stability to your district.

As you are most likely aware, periodically, over the past 8 years, MISEC has offered a GCC (Gas Customer Choice) Program to many of its members as a competitive alternative to their local gas utility. The GCC Program is seamless and transparent to your district and is completely managed by MISEC.

We are currently working with many suppliers in an effort to offer our members an alternative to the ever increasing natural gas costs and will, hopefully, in the next few weeks, be in the position to offer you a competitive 12 or 24 month fixed price for natural gas.

Please be aware that, due to utility restrictions, the earliest that we can start this program is April 1st.

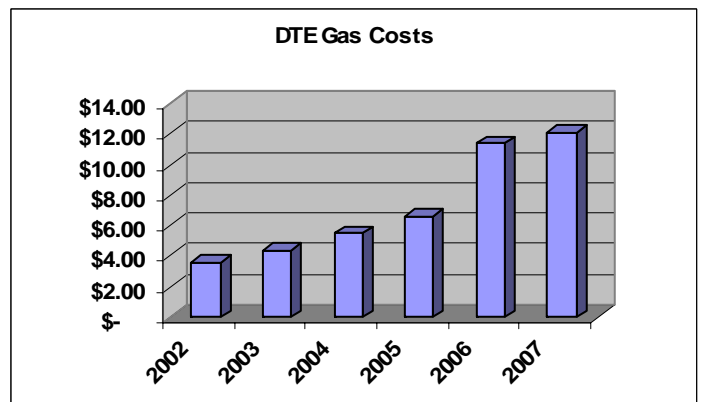

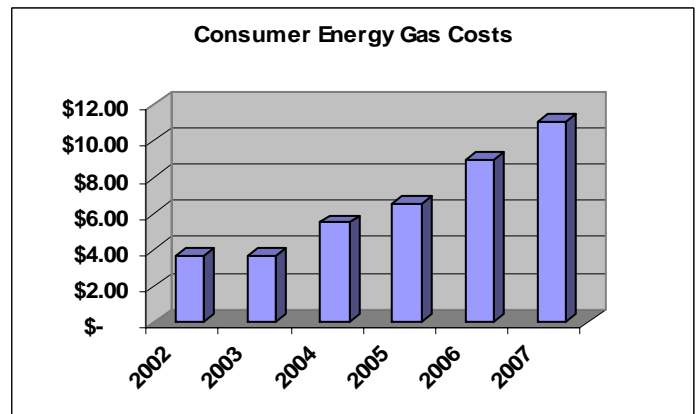

If you are interested in participating in this program, please complete the attached form and return it to us as soon as possible.

Once we receive your form, we will match it up with previously provided information that you may have already forwarded to us.

If we have not received any information from you in the recent past regarding your district's natural gas accounts, then we will contact you and request that you forward us copies of your recent utility invoices.

In addition, should you receive information from a supplier offering you an opportunity to participate in a GCC Program, please forward that information to us for evaluation.

Should you have any question, please do not hesitate to contact us:

MICHIGAN SCHOOLS ENERGY COOPERATIVE
